

DO YOU KNOW WHERE YOUR LOAD CONTAINERS ARE AT THIS PRECISE MOMENT IN TIME?

WHICH OF THEM WILL HAVE TO BE REPLACED IN THE NEAR FUTURE?

WHAT YOUR OVERALL COSTS ARE INTERNATIONALLY?

The amount of effort involved in load carrier management is often underestimated, and a lack of processes, responsibilities, and transparency with regard to the movement of load containers can cost time and money. The potential savings generated by an end-to-end management concept are therefore considerable.

A FULL-SERVICE PACKAGE

CHG-MERIDIAN will draw up a customized business concept for you that covers all aspects of load carrier management, from financing and administration to remarketing. This reduces the burden on you so that you can concentrate on your core business.

With the aid of tracking modules and our TESMA® digital management software, we create complete transparency for all load container movements, across the globe and regardless of manufacturer. This makes it easy to identify and deliver potential savings.

If you already have a stock of load containers, we can easily incorporate them into our solution via a transfer of ownership. You benefit from a direct influx of money and can flexibly replace old containers with new ones as necessary.

Using the TESMA® app, you can track the location of your load containers on your smartphone.

TESMA® DELIVERS MAXIMUM TRANSPARENCY

If you want to know where your load containers are currently located or which routes they are taking, if you want to check contracts or technical data, or if you have ordered new load containers and want to know the status of the delivery, TESMA® brings together the technical and administrative data and gives you all the information you need at a glance.
